Dear Resident

Re: Planned improvement works to council properties

In partnership with Equans, the Council will be carrying out works on neighbouring Council properties in your area; these works will include erecting scaffolding, installing external wall insulation, new roofs, windows and doors. Work will begin summer 2023 to be completed by autumn 2025 (weather permitting).

We do not expect your property to be included, however, we have to provide alternative addresses in our planning application as the work is funded in part by a government grant for 180 houses. This means that to secure as much funding as possible we need to identify other council properties to have the works done if we are unable to undertake the work on any of our original list of 180.

Your property is one of these alternative addresses so we are writing to make you aware that we will be putting in a planning application which means you will receive letters from planning. You do not need to do anything. If we need to include your property in the works before autumn 2025 we will write to you again.

Although your property is unlikely to receive works this time round it may be considered if funding becomes available in the future.

Please call or email us using the details at the top of this letter if you have any questions or concerns.

Yours sincerely

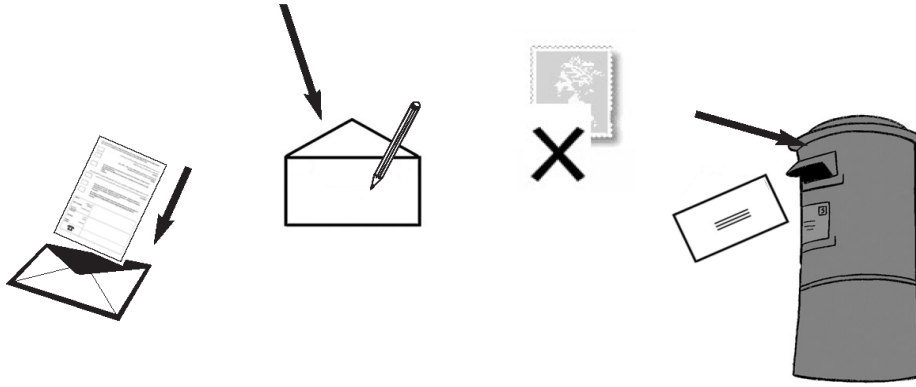

Ben Hanson

Head of Strategy, Market Intervention and Growth
